1. Nature of operations

Camino Minerals Corporation ("Camino" or "the Company") is an exploration stage company that is engaged in the exploration and development of mineral properties. The Company is incorporated in British Columbia, Canada. The address of its registered and head office is Suite 300, 250 Southridge, Edmonton, A.B., Canada, T6H 4M9. The Company is focused on evaluating and acquiring exploration projects with significant potential for advancement from discovery through to production, in Canada and abroad.

These consolidated condensed financial statements have been prepared on a going concern basis, which contemplates the realization of assets and liquidation of liabilities during the normal course of operations for the foreseeable future. There are significant uncertainties related to certain adverse conditions and events that may cast doubt on the validity of this assumption. As at January 31, 2020, the Company had a working capital deficiency of \$175,683 (2019 - working capital of \$352,774) and an accumulated deficit of \$35,518,157 (2019 - \$34,223,621). The Company's ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing or maintaining continued support from its shareholders and creditors, and generating profitable operations in the future, which indicate the existence of a material uncertainty that may cast significant doubts about the Company's ability to continue as a going concern. These financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying financial statements.

2. Basis of presentation

These consolidated condensed interim financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34 "Interim Financial Reporting". They do not include all of the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements for the year ended July 31, 2019, prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These financial statements were authorized for issue by the Audit Committee of the Company on March 31, 2020.

These consolidated condensed financial statements include the accounts of the Company, and its wholly owned subsidiaries Minquest Peru SAC ("Minquest"), Recursos Mineros Rojo S.A. de C.V. ("RMR"), Camino Resources SAC ("CRM"), and Mining Activities SAC ("MinAc"). All intercompany transactions and balances have been eliminated.

Camino Resources SAC	Peru	100%	Holds mineral interests in Peru
Mining Activities SAC	Peru	100%	Holding company
Recursos Mineros Rojo	Mexico	100%	Holding company
S.A. de C.V.			

These consolidated condensed interim financial statements are presented in Canadian Dollars, unless otherwise noted and have been prepared on a historical cost basis. The Canadian dollar is the functional and presentation currency of the Company.

The accounting policies applied in preparation of these condensed interim financial statements are consistent with those applied and disclosed in the Company's consolidated financial statements for the year ended July 31, 2019, unless otherwise stated.

3. Management estimates and judgments

The preparation of these consolidated condensed interim financial statements requires management to make certain estimates, judgments and assumptions that affect the amounts reported and disclosed in its condensed interim financial statements and related notes. Those include estimates that, by their nature, are uncertain and actual results could differ materially from those estimates. The impacts of such estimates may require accounting adjustments based on future results. Revisions to accounting estimates are recognized in the period in which the estimate is revised.

The areas which require management to make significant estimates, judgments and assumptions in determining carrying values are consistent with those applied and disclosed in the Company's financial statements for the year ended July 31, 2019, unless otherwise stated.

4. Exploration and Evaluation Properties

Expenditures on the Company's mineral exploration properties are summarized as follows:

6. Financial instruments and risk management

The Company is exposed to the following financial risks:

- i) Market risk
- ii) Credit risk
- iii) Liquidity risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in the note.

General objectives, policies and processes

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure effective implementation of the objectives and policies to the Company's finance function.

The overall objective of the Board and the Company's finance function is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility and to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. Further details regarding these policies are set out below.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of three types of risk: currency risk, interest rate risk, other price risk.

Currency risk

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's share capital as well as the Company's reporting currency is denominated in Canadian Dollars. The Company operates projects in more than one country. As a result, a portion of the Company's cash, accounts receivable, accounts payable and accruals are denominated in U.S. Dollars and Peruvian Soles and are therefore subject to fluctuation in exchange rates. As at January 31, 2020, a 1% change in the exchange rate between the Canadian and U.S. dollar or the Canadian dollar and Peruvian Soles would not be material.

Interest rate risk

Interest rate risk is the risk arising from the effect of changes in prevailing interest rates on the Company's financial instruments. The Company holds no interest-bearing financial liabilities, therefore interest rate risk is limited to potential decreases on the interest rate offered on cash held with its financial institution. The Company considers this risk to be minimal.

Credit risk

Credit risk is the risk of potential loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's cash is held with reputable institutions in Canada. The Company is not exposed to any material credit risk. The Company's maximum exposure to credit risk is \$6,543 (2019 - \$376,495).

<u>Liquidity risk</u>

Liquidity risk is the risk that the Company will not meet its financial obligations as they fall due. The Company monitors its risk by monitoring the maturity dates of its existing debt and other payables. The Company's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities when they become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

To achieve this objective, the Company regularly monitors working capital positions and updates spending plans as considered necessary. Monthly working capital and expenditure reports are prepared by the Company's finance function and presented to management for review and communication to the Board. As at January 31, 2020, all of the Company's financial liabilities are due within one year.

As at January 31, 2020, the Company had a working capital deficiency of \$175,683 (2019 - working capital of \$352,774) and it does not have any monetary long-term liabilities. The continuing operations of the Company are dependent upon its ability to obtain adequate financing and to commence profitable operations in the future.

Determination of fair value

The statements of financial position carrying amounts for cash, accounts receivable, and accounts payable and accrued liabilities approximate fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

Capital management

The Company monitors its equity as capital.

The Company's objectives in managing its capital are to maintain a sufficient capital base to support its operations and to meet its short-term obligations and at the same time preserve inventor's confidence and retain the ability to seek out and acquire new projects of merit. The Company is not exposed to any externally imposed capital requirements.

7. Related party transactions

Unless otherwise noted, related party transactions were incurred in the normal course of operations and are measured at the amount established and agreed upon by the related parties. The Company incurred and paid fees to directors and officers for management and professional services as follows:

For the six months ended	Ja	nuary 31 2020	Ja	anuary 31 2019
Management and consulting fees	\$	45,000	\$	63,700
Investor relations fees paid to a corporation controlled by a director		30,000		30,500
Office and admin fees paid to a corporation controlled by key management		19,000		10,104
Investor relations fees paid to a corporation controlled by key management		-		8,000
Share-based payments		-		94,735
	\$	94,000	\$	207,309

Related party amounts are unsecured, non-interest bearing and due on demand. These transactions are measured by the exchange amount that is the amount agreed upon by the transacting parties and are on terms and conditions similar to non-related parties. As at January 31, 2020, \$63,806 (2019 - \$15,948) is due to related parties of the Company and is included in accounts payable and accrued liabilities.

8. Subsequent events

Private Placement

Subsequent to January 31, 2020, the Company completed a non-brokered private placement of 7,500,000 common share units at \$0.08 per unit for gross proceeds of \$600,000. Each unit consisted of one common share and one common share purchase warrant of the Company. Each whole warrant is exercisable to acquire one additional common share at \$0.105 per share until February 3, 2022.

Temporary Suspension of Peru Operations

On March 15, 2020 the Peruvian government mandated a lockdown of the country extending to April 12, 2020, including prohibiting movements within the country, in response to the COVID-19 pandemic. As a result, the Company has suspended all field operations and will only restart once permitted by the government and once the Company is confident that it is safe to do so.
