#### **Forward Looking Statements**

Certain information regarding the Company contained herein may constitute forward-looking statements within the meaning of applicable securities laws. Forward-looking statements may include estimates, plans, expectations, opinions, forecasts, projections, guidance or other statements that are not statements of fact. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct. The Company cautions that actual performance will be affected by a number of factors, many of which are beyond the Company's control, and that future events and results may vary substantially from what the Company currently foresees. Documents outlining the various factors that may affect future results are available at www.sedar.com. The Company's forward-looking statements are expressly qualified in their entirety by this cautionary statement.

#### Forward Looking Statements or Information Related to Exploration

Relating to exploration, the identification of exploration targets and any implied future investigation of such targets on the basis of specific geological, geochemical and geophysical evidence or trends are future-looking and subject to a variety of possible outcomes which may or may not include the discovery, or extension, or termination of mineralization. Further, areas around known mineralized intersections or surface showings may be marked by wording such as "open", "untested", "possible extension" or "exploration potential" or by symbols such as "?". Such wording or symbols should not be construed as a certainty that mineralization continues or that the character of mineralization (e.g. grade or thickness) will remain consistent from a known and measured data point. The key risks related to exploration in general are that chances of identifying economical reserves are extremely small.

The presentation contains historical exploration data that have not been verified by Camino Minerals Corp. and may not be accurate or complete, and therefore the information should not be relied upon.

Owen D. W Miller, Ph.D FAusIMM(CP), a Qualified Person as defined by NI 43-101, has reviewed and approved the technical contents of this document.

# JAY CHMELAUSKAS, BASc Geol. Eng., MBA - CEO, President & Director

#### **SHARE PRICE CHART – 6 Months**

## Why Peru?

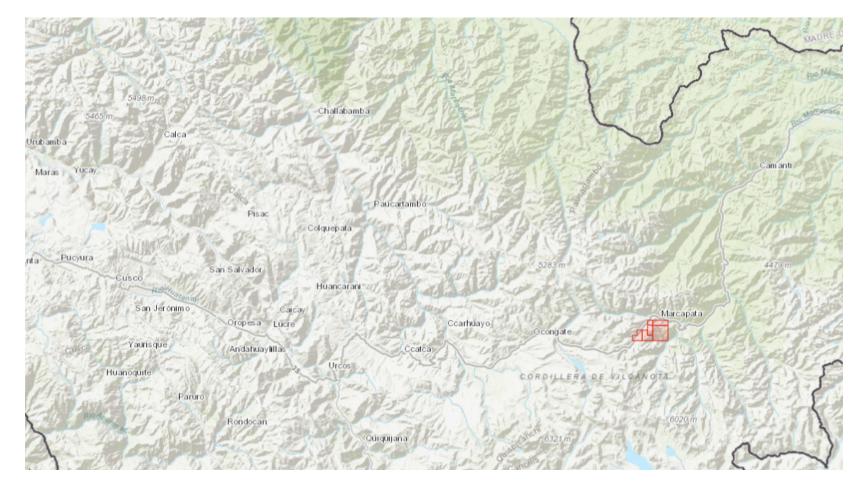

AMINO

- Peru has the world's largest silver reserves, and world's third-largest copper reserves;
- Stable governments with favourable mining and tax laws;
- Under-explored projects available through staking or low-cost acquisition.

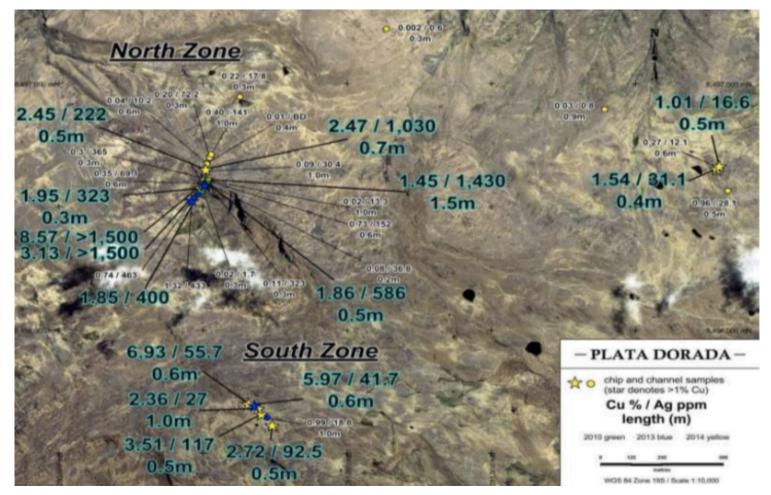

- High Grade Copper-Silver Project;
- 100% Ownership;
- 6 Contiguous Concessions Totalling 2,100 Ha;
- Property is located 158 km east of Cuzco from paved highway to Brazil;
- Property is accessible all year round by paved highway and allweather dirt roads.

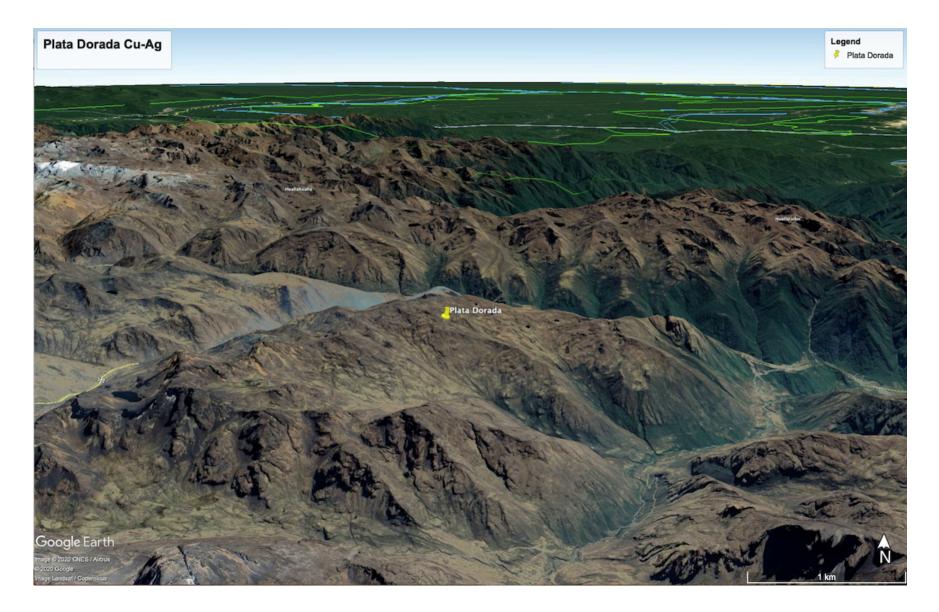

- Copper values ranging from 0.3% to 8.7%;
- Silver values ranging from 70 g/t to over 1,500 g/t;
- Gold present in trace amounts;
- Multiple veins sets and individual strike lengths are in excess of 100 m;
- Fieldwork goals are to identify potential extensions under cover.

Very high-grade silver and copper with gold in massive sulphide veins.

## Plata Dorada Project

CAMINO TSX.V : COR | OTCQB : CAMZF | WKN: A116E1

Known veins are well-exposed and ready to drill.

North Zone

#### Potential to discover new veins on the property.

South Zone
